Fun & Engaging Activities For Effective Skills Practice

Differentiate by placing students in sections needing improvement!

You can use the decodable passages as assessments!

Check Out what buyers have to say:

I love this bundle! It is a great tool with multiple activities to help students learn to read. I love that it is easy to store and organize. It is also good for testing and documentation purposes. Thank you for this awesome bundle, I highly recommend it. Kaitlin

This resource was great. My students are enjoying these resources. This is an excellent resource to teach students how to blend sounds to words.
Lolita

LOVE this blending binder! It was perfect for additional support with blending, fluency, and even included some comprehension skills. I primarily use this with a small group or one-on-one with a student who may be having difficulty putting sounds together and with fluency. My aide enjoyed using this with a student as well; easy to use and fun for the kiddo. I put the pages in plastic sleeves so the student could write on them with an expo marker. Caitlin

I would suggest this resource to teachers who have students who are struggling to read grade level material independently. It is a great way to check their application of blends and digraphs to provide intervention immediately. It also provide a gradual increase of complexity for the students to continue practicing their blends/digraphs.
Stephanie

Great resource and well organized. This product is great for struggling students and to build fluency. My students love it! Thank you!
Adriana
