# HAPPY TEACHERS SAID...

Conversations  
IN LITERACY

**My students loved this resource. They were so excited to document their knowledge of plants. My classroom has a class garden and I used this resource as an assessment to see if my students were ready to begin.**

**This was an awesome end of unit project for plants! It took them a few days to finish and it helped me see if they really understood the concepts! I have used it two years in a row!**

**My students loved showing their learning about plants by creating the flip books. They were so proud of them I even showed them at their student led conferences and they showed their learning in science through this resource !  
Would recommend!**

**This was the perfect flipbook for our plants unit. We read about plants in our reading curriculum and this was a fun way to share what we were learning. We did them as a class and did 1-2 pages per day. I loved that they had something to take home and share.**
